## Absolute positioning

BENEFITS	CHALLENGES
easy to learn	easy overlap
predictable	no bottom

# Floating

## BENEFITS

less overlap

clearable bottom

## CHALLENGES

learning curve

fluidity

# dynamic templates

32

## descendant selectors

Define rules for default case

```
#main { . . . }
```

Create rules that override the default

```
.exception #main { . . . }
```

Add that class/id to the body

```
<body class="exception">
```

## column naming conventions

M = main

S = sub

X = extra

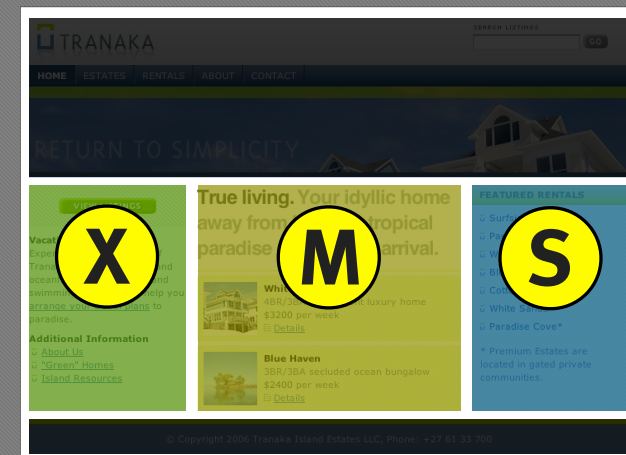

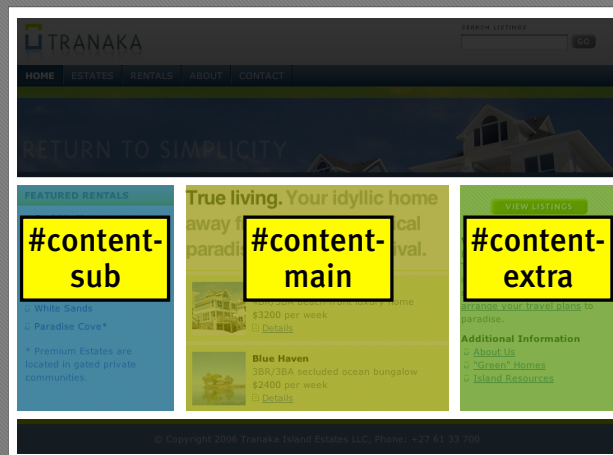

M = main

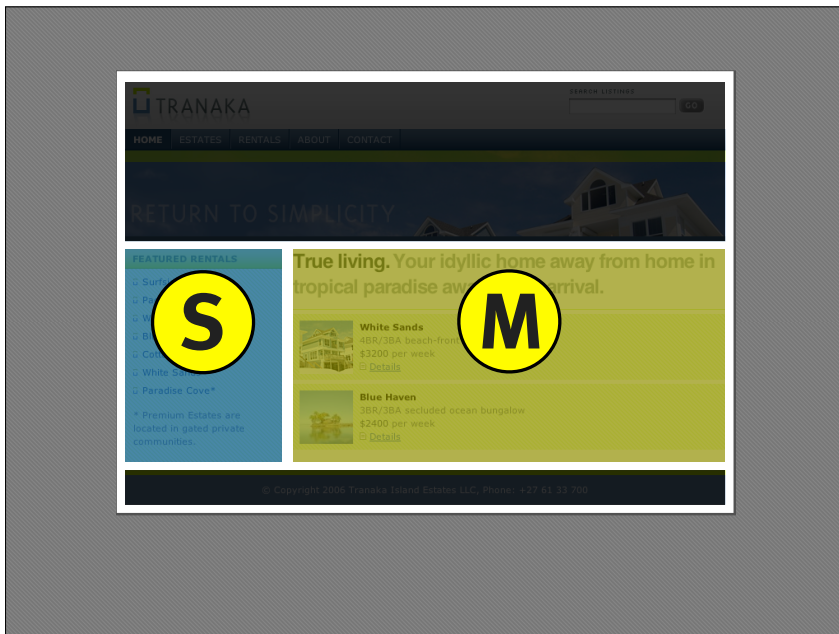

MS = main | sub

SM = sub | main

SMX = sub | main | extra

XMS = extra | main | sub

37

## AP templates

```
<body>

#maincol {
  float: left;
  width: 510px;
}

#subcol {
  float: right;
  width: 180px;
}
```

MS  
(default)

38

## AP templates

```
<body class="sm">

.sm #maincol {
  float: right;
}

.sm #subcol {
  float: left;
}
```

SM

39

## AP templates

```
<body class="smx">

.smx .wrap {
  /* wrapped around SM */
  float: left;
  width: 510px;
}

.smx #maincol {
  float: right;
  width: 310px;
}

.smx #subcol {
  float: left;
}
```

SMX
